

MOSPEC Semiconductor's Statement Regarding the Restriction of Hazardous Substances

This document is MOSPEC Semiconductor's statement with regard to the Directive of 2002/95/EC of the European Parliament and of the council on the restriction of the use of certain hazardous substances in electrical and electronic equipment (RoHS directive). The responses in the document are based upon information collected from MOSPEC Semiconductor facilities worldwide.

Products manufactured by MOSPEC Semiconductor are in compliance with RoHS directive. Specifically, products manufactured by MOSPEC Semiconductor do not contain the substances listed in the table below in concentrations greater than the listed Maximum Limit value.

Substance	Maximum Limit(ppm)
Cadmium(Cd)	100
Lead(Pb)	1000 ⁽¹⁾⁽²⁾
Mercury(Hg)	1000
Hexvalent Chromium(Cr ⁶⁺)	1000
Poly Brominated Biphenyls(PBB)	1000
Poly Brominated Disphenyl ethers(PBDE)	1000

⁽¹⁾Applicable to MOSPEC products with Pb-free lead finish only

⁽²⁾Maximum limit does not apply to applications for which exemptions have been grant by the RoHS directive

Name: Sonny Yang

Date: November 15, 2005

Position: MOSPEC QA Department Section Manager

**MOSPEC
SEMICONDUCTOR**

Environmental Questionnaire Disclaimer

The information provided in this environmental statement is, to our knowledge, correct as of the date indicated on this page. However, there is no guarantee to completeness or accuracy, as some information is derived from data sources outside the company. Also, there may not be information included in this statement regarding the minute amounts of dopant and metal materials contained within the electrically active or passive devices contained within the finished product.
