

Greenhouse Gas Verification Statement

The inventory of Greenhouse Gas emissions in year 2017 of
MOSPEC SEMICONDUCTOR CORP.
XINSHI Plant

No.76, Zhongshan Rd., Xinshi Dist., Tainan City 744, Taiwan

has been verified in accordance with ISO 14064-3:2006 as
meeting the requirements of

ISO 14064-1:2006

Direct emissions

484.4164 tonnes of CO₂e

Energy indirect emissions

5,868.8022 tonnes of CO₂e

Direct emissions and energy indirect emissions

6,353.219 tonnes of CO₂e

Authorized by

David Huang

Director

Date: 28 May 2018

Statement TW18/00126GG, continued

SGS has been contracted by MOSPEC SEMICONDUCTOR CORP. XINSHI Plant (hereinafter referred to as "MOSPEC"), No.76, Zhongshan Rd., Xinshi Dist., Tainan City 744, Taiwan for the verification of direct and indirect Greenhouse Gas emissions in accordance with

ISO 14064-3: 2006

as provided by MOSPEC (hereinafter referred to as "MOSPEC, No.76, Zhongshan Rd., Xinshi Dist., Tainan City 744, Taiwan, in the GHG Assertion in the form of GHG report covering GHG emissions of the period 01 January 2017 to 31 December 2017.

Roles and responsibilities

The management of MOSPEC is responsible for the organization's GHG information system, the development and maintenance of records and reporting procedures in accordance with that system, including the calculation and determination of GHG emissions information and the reported GHG emissions.

It is SGS's responsibility to express an independent GHG verification opinion on the GHG emissions as provided in the GHG Assertion for the period 01 January 2017 to 31 December 2017.

SGS conducted a third party verification of the provided GHG assertion against the principles of ISO 14064-1:2006, ISO 14064-3:2006 and TW EPA Guidelines for GHG Validation and Verification (2010.12) in the period 04 May 2018 to 21 May 2018. The verification was based on the verification scope, objectives and criteria as agreed between MOSPEC and SGS on 12 Feb. 2018.

Level of Assurance

The level of assurance agreed is that of reasonable assurance.

Scope

MOSPEC has commissioned an independent verification by SGS Taiwan of reported GHG emissions of MOSPEC arising from production of power semiconductor activities, to establish conformance with ISO 14064 principles within the scope of the verification as outlined below.

This engagement covers verification of emission from anthropogenic sources of greenhouse gases included within the organization's boundary and is based on ISO 14064-3:2006.

- Title or description activities: GHG verification for MOSPEC in year 2017
- Location/boundary of the activities:

Statement TW18/00126GG, continued

- No.76, Zhongshan Rd., Xinshi Dist., Tainan City 744, Taiwan
- Physical infrastructure, activities, technologies and processes of the organization: production of power semiconductor
- GHG sources, sinks and/or reservoirs included: Sources as presented in the inventory spreadsheet provided by MOSPEC
- Types of GHGs included: CO₂, CH₄, N₂O, HFCs, PFCs, SF₆, NF₃
- The IPCC 2007 AR4 GWP values are applied in this inventory.
- Electricity emission factor: 0.529 kgCO₂e/kwh (Announced by Bureau of Energy, Ministry of Economic Affairs in 2017)
- Directed actions: NA
- GHG information for the following period was verified: 01 January 2017 to 31 December 2017
- The version of inventory sheet: 20180521
- The version of GHG assertion: 20180521
- Intended user of the verification statement: Private

Objective

The purposes of this verification exercise are, by review of objective evidence, to independently review:

- Whether the GHG emissions are as declared by the organization's GHG assertion
- The data reported are accurate, complete, consistent, transparent and free of material error or omission.

Criteria

Criteria against which the verification assessment is undertaken are the principles of ISO 14064 and TW EPA Guidelines for GHG Validation and Verification (2010.12)

Materiality

The materiality required of the verification was considered by SGS to 5%, based on the needs of the intended user of the GHG Assertion.

Conclusion

MOSPEC provided the GHG assertion based on the requirements of ISO14064-1: 2006. The GHG information for the period 01 January 2017 to 31 December 2017 disclosing emissions of 6,353.219 metric tonnes of CO₂ equivalent and 0.0000 metric tonnes of direct CO₂ emissions from the combustion of biomass are verified by SGS to a reasonable level of assurance, consistent with the

agreed verification scope, objectives and criteria.

SGS's approach is risk-based, drawing on an understanding of the risks associated with reporting GHG emissions information and the controls in place to mitigate these. Our examination includes assessment, on a test basis, of evidence relevant to the amounts and disclosures in relation to the organization's reported GHG emissions.

We planned and performed our work to obtain the information, explanations and evidence that we considered necessary to provide a reasonable level of assurance that the GHG emissions for the period 01 January 2017 to 31 December 2017 are fairly stated.

We conducted our verification with regard to the GHG assertion of MOSPEC which included assessment of GHG information system, monitoring and reporting plan/protocol. This assessment included the collection of evidence supporting the reported data, and checking whether the provisions of the protocol reference, were consistently and appropriately applied.

In SGS's opinion the presented GHG assertion

- is materially correct and is a fair representation of the GHG data and information, and
- is prepared in accordance with ISO14064-1:2006 and TW EPA Guidelines for GHG Validation and Verification (2010.12) on GHG quantification, monitoring and reporting.

Confidentiality

The reports and attachments may contain relevantly confidential information of the clients. In addition to being submitted as governmental application or certification documents, the reports and attachments are not allowed to be edited, duplicated, or published without the clients' agreement in written form.

Avoidance of Conflict of Interest

The reports and attachments are completely complied with the standards and procedures that related-authorities established. The reports and attachments of auditing process are conduct with fairness and honesty. If not, the auditing institution not only has to bear the relevant compensation duties, but also to receive legal charge and punishment.

This statement shall be interpreted with the GHG assertion of MOSPEC as a whole.

Verifier Group

Statement TW18/00126GG, continued

Above statements coincide with auditing process with fairness and impartiality, and aim at the emission of year 2017 of clients.
